ALTERNATE SOURCES OF ENERGY & ENERGY CONSERVATION MEASURES

Part A: Alternate Sources of Energy: Solar PV Power Generation Plant

Lala Lajpatrai College of Law is dedicated to reducing and effectively managing its electricity consumption in an environmentally responsible manner. The college is firmly committed to diminishing its reliance on electricity derived from non-renewable sources. Instead, it aims to transition to eco-friendly energy alternatives such as solar power to illuminate the campus. In alignment with this commitment, during the academic year 2018-19, the college took a significant step by installing a Captive Solar PV Power Generation Plant (Ongrid-3KWP) on the rooftop. This installation, completed on October 10th, 2019, taps into abundant solar resources to produce sustainable, green, and clean energy through a Solar PV power generation system.

Part B: Energy Conservation Measures:

1) Installation of LED Lights in the College Campus

Lala Lajpatrai College of Law has embraced the use of energy-saving LED lighting solutions as part of its commitment to sustainability and environmental responsibility. These LED lights provide brilliant illumination while consuming far less electricity compared to traditional lighting, resulting in substantial cost savings for the institution. This enhances the learning environment in the Institution.

Part B: Energy Conservation Measures:

2) Using Energy Efficient Electrical Gadgets

Lala Lajpatrai College of Law recognizes the importance of energy conservation and sustainability in today's world. To contribute to a greener campus, the college has implemented energy-saving electrical appliances, such as air conditioners and refrigerators. These modern appliances are designed to be energy-efficient, helping reduce the college's carbon footprint and energy costs. By using these gadgets responsibly and maintaining them properly, the college community not only ensures a comfortable environment but also demonstrates its commitment to a more sustainable future.

Part B: Energy Conservation Measures:

3) Switch Off Lights & Fans when Not in Use

To sensitize our students and every stakeholder about the importance of energy conservations, sign boards have been installed in all classrooms and offices to remind them about conservation of energy by switching off lights and fans when not required
